DHIREN JUMMANI

Software Engineer

SUMMARY

Results-driven Shopify & WordPress Developer skilled in building responsive, high-performance websites and scalable eCommerce solutions. Experienced in Shopify Liquid, WordPress, REST API integrations, and performance optimization. Proficient in frontend development, debugging, and delivering user-focused digital experiences. Currently expanding my expertise in AI technologies and exploring AI-powered development solutions. Strong team player with experience in Git workflows, collaboration, and client communication.

WORK EXPERIENCE

Crest Infosystems | August 2026 - Present

Senior Software Engineer

- Developed and enhanced TCMReview website functionalities while following coding standards and best practices to ensure clean, maintainable code and a user-friendly experience.
- Building foundational knowledge in AI and LLM technologies, including Python, AI/LLM fundamentals, and prompt engineering.
- Exploring embeddings, Retrieval-Augmented Generation (RAG), and tool/function calling to understand and develop AI-powered applications.

Netizens Technologies | July 2024 - February 2026

Senior Software Engineer

- Developed responsive and user-friendly Shopify stores tailored to client requirements.
- Customized Shopify themes using Liquid, HTML, CSS, JavaScript, and Shopify sections.
- Integrated third-party Shopify apps and enhanced store functionality to meet business needs.
- Optimized website performance, SEO, and mobile responsiveness while collaborating with clients to deliver effective eCommerce solutions.

Solwin Infotech LLP | January 2021 - February 2024

WordPress Developer

- Improved user experience by implementing responsive web design and optimizing website performance across devices.
- Diagnosed and resolved technical issues quickly to maintain website stability and ensure high user satisfaction.
- Developed and customized WordPress themes and plugins to extend functionality and meet project requirements.
- Optimized website performance through plugin evaluation and caching strategies, while managing version control with Git/GitHub and collaborating with cross-functional teams.
